

Germán Bonacchi

TECHNICAL LEAD /
SENIOR FRONTEND ENGINEER

PERSONAL INFORMATION

bonacchigerman@gmail.com
+54 0 11 5836 2197
Buenos Aires, Argentina

ABOUT ME

Software engineer specialized in **e-commerce on the VTEX platform**, with experience in **modern frontend development and technical leadership** in large-scale production environments. I actively participate in cross-functional teams, combining hands-on development with technical definition and decision-making to solve complex problems with real impact on business and user experience.

I value technical quality, continuous improvement, and **technical training and team enablement**, understanding that problems do not have a single solution and that the engineer's role is to **make technical decisions with judgment and responsibility**.

WORK EXPERIENCE

VALTECH

Technical Lead | April 2024 - Present

- Technical leadership of frontend teams on VTEX-based ecommerce projects.
- Definition of frontend architecture, quality standards, and best practices using React and TypeScript.
- Technical training, coaching, and continuous support for senior and semi-senior developers.
- Code reviews, technical debt management, and continuous improvement of maintainability.
- Coordination with stakeholders, product teams, and other technical leaders to ensure technical and business alignment.

Senior Frontend Developer | September 2022 - April 2024

- Development of complex frontend applications for VTEX ecommerce, using React and TypeScript.
- Implementation of reusable components, state management patterns, and performance optimizations.
- Close collaboration with design, backend, and QA teams.
- Active participation in technical definitions, estimations, and functional refinements.

VTEX

Regional Product Team LATAM | April 2022 - September 2022

- Technical leadership for the analysis and resolution of known issues impacting LATAM clients.
- Technical training in VTEX IO for internal teams and partners.
- Specialized support for Customer Excellence teams.
- Issue prioritization and escalation to the Core Product Team.

Head of First Party Apps APUB | February 2022 - April 2022

- Leadership of First Party application development teams.
- Implementation of Agile Scrum methodology.
- Work organization, progress tracking, and process improvement.

First Party Apps Engineer | March 2021 - February 2022

- Frontend development using React (Hooks) and GraphQL.
- Development of microservices using Node.js.
- Technical support for partners and clients.

ALTOCOM S.R.L.

Developer | September 2017 - January 2021

- Development and testing of web applications.
- Deployment and migration of application modules to production.
- Development of solutions using Oracle APEX, PL/SQL, and JavaScript.
